

Leveling Agent GLP388

I Description

Leveling agent GLP388 is a polyacrylate with silica carrier. It's developed especially to correct surface imperfection, such as craters, pinhole and eye-fishes, It gives very good flow. GLP388 may be applied in all types of powder coatings.

II Technical data

GLP388	Test Method	Specification
Appearance	Visualization	White granules
Active Ingredient	GB/T 7531-2008	66%min
Solid Content	GB/T 1725-2008	97.5%min

III Application

- 1 GLP388 can be used in all system of powder coatings.
- 2 GLP388 helps to eliminate the orange peel and craters of film effectively.
- 3 As free flow powder, it's easily incorporated into powder coating formulation by the standard dry-blend operation and homogenized with resin and other components to form a uniform system.
- 4 The dosage of GLP388 in formulation is about 0.7~1.5%wt.

IV Package, Storage & Handling

Available in polyethylene-lined, multi-ply paper bags, N.W.20KGS/Bag.
Keep in the cool and dry place, keep away from fire.
